Frontend Development

◇ Advanced Frontend Development
◇ Cutting-edge UI/UX Design
◇ Responsive Web Development
◇ Cross-platform Compatibility
◇ Performance Optimization
◇ Interactive User Interfaces
◇ Progressive Web Applications
◇ Framework Proficiency

Frontend Development Expertise with AI Integration

◇ Natural Language Processing (NLP) for Chatbots
◇ Image Recognition and Processing for Visual Content
◇ Personalized Content Recommendations
◇ Predictive Analytics for User Behavior
◇ Voice User Interfaces (VUI) for Speech Recognition
◇ Sentiment Analysis for User Feedback
◇ Machine Learning Models for Dynamic UI Adaptation
◇ AI-powered Accessibility Solutions
◇ Automated Testing and Quality Assurance
◇ AI-driven Performance Optimization
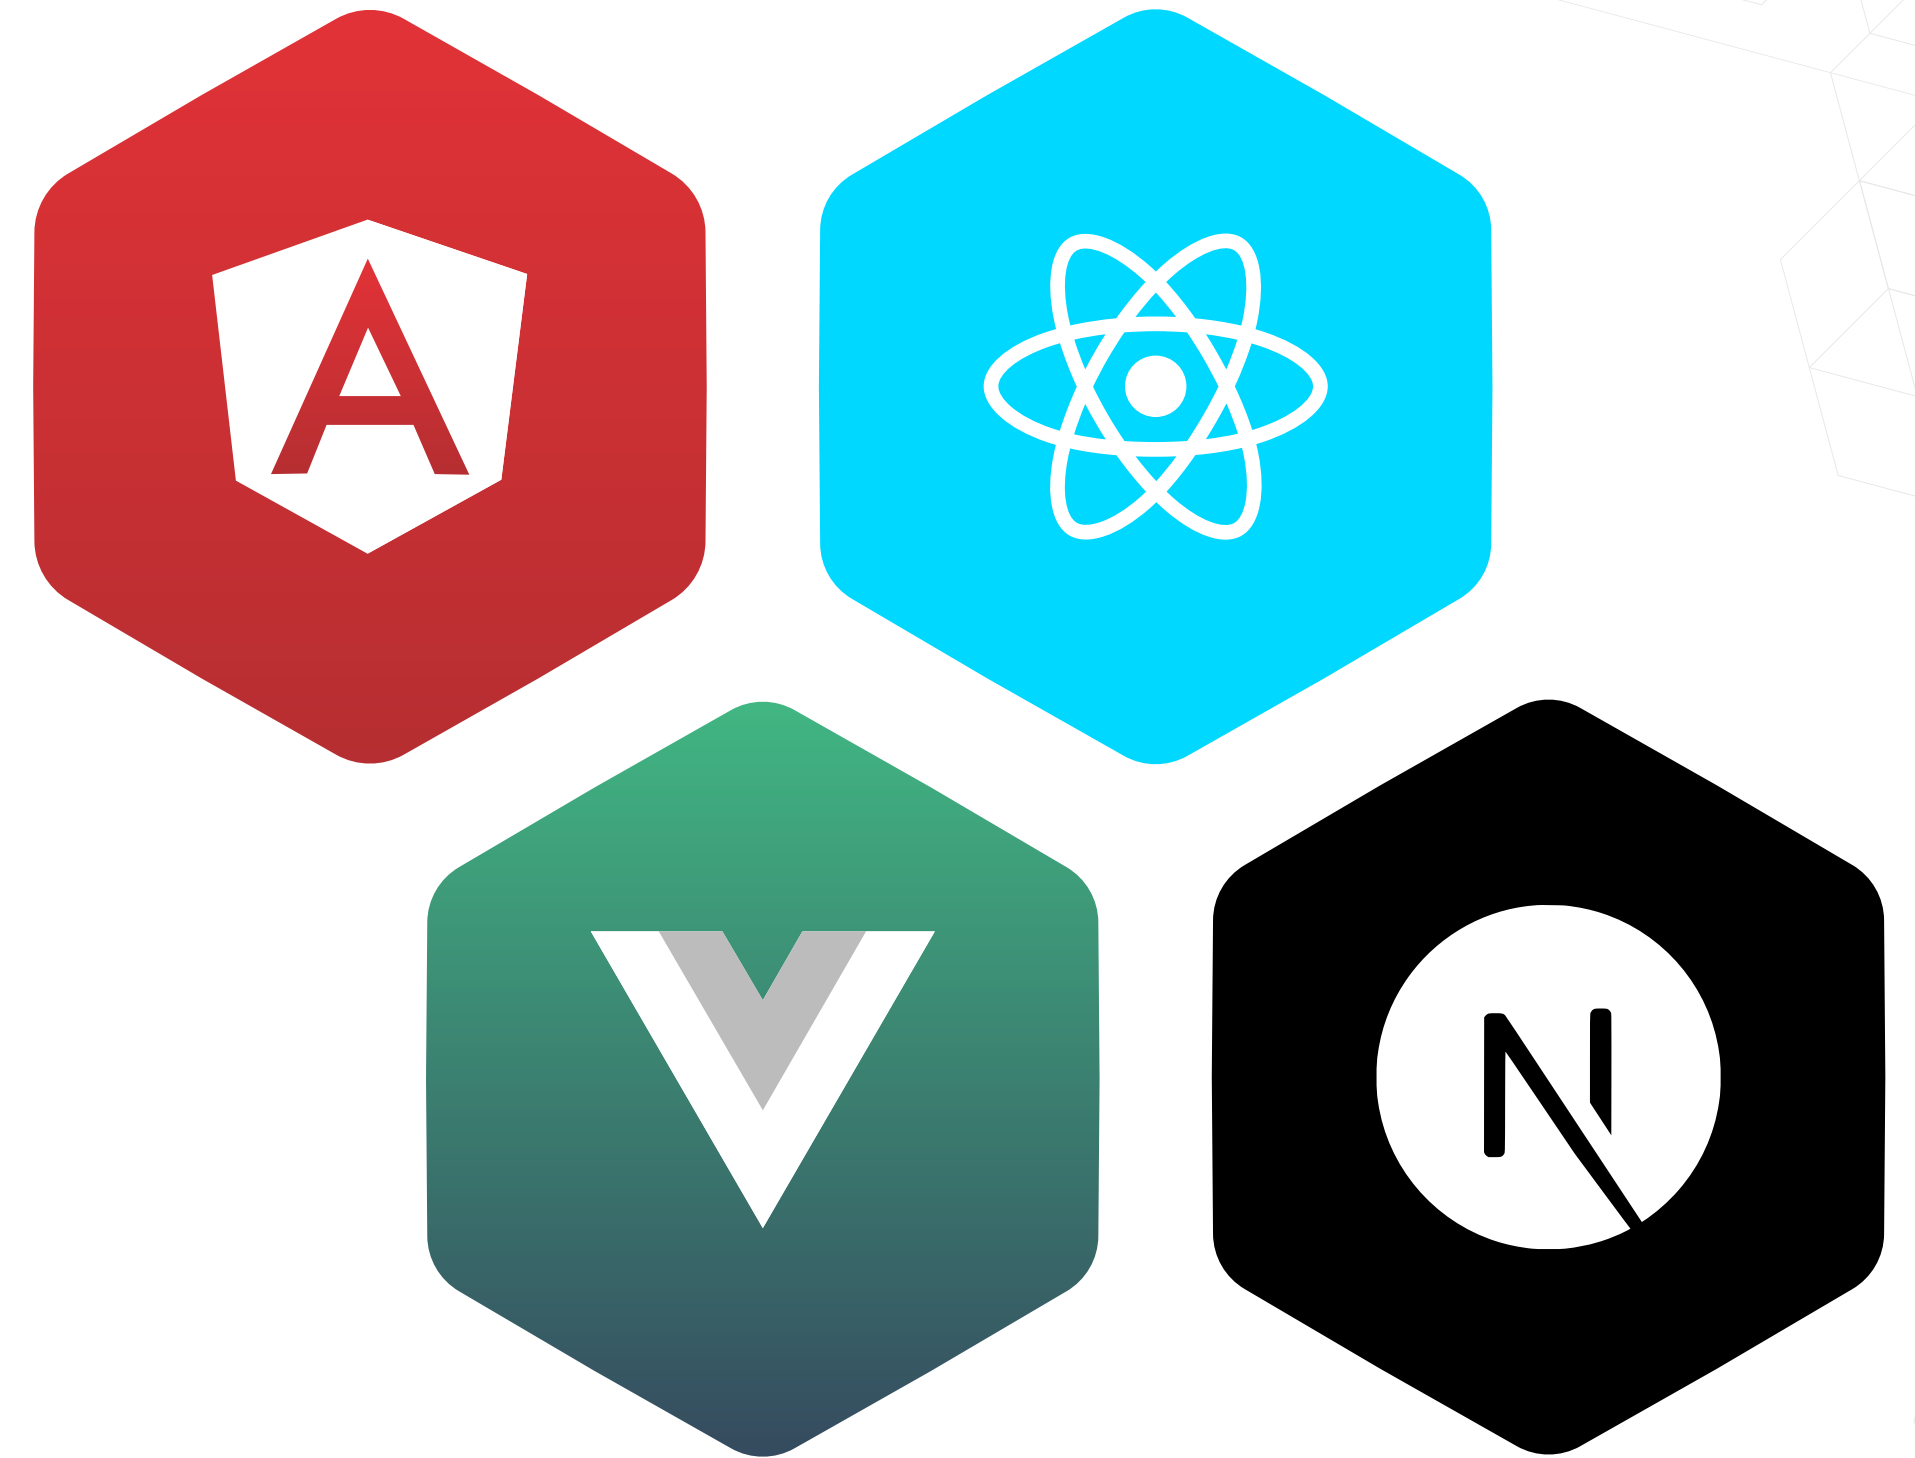

Backend Development

Our Backend Expertise

◇ Backend Development for Various Industries

◇ Database Design and Management

◇ API Development and Integration

◇ Server-side Logic Implementation

◇ Scalability and Performance Optimization

◇ Third-party Service Integration

◇ Security Implementation

◇ DevOps Practices and Continuous Deployment

Backend Development Expertise with AI Integration

◇ AI-driven Data Analysis and Insights Generation

◇ Predictive Analytics for Business Decision Making

◇ Natural Language Processing (NLP) for Data Processing

◇ Machine Learning Models for Personalization and Recommendation

◇ AI-powered Security Solutions for Threat Detection and Prevention

◇ Automated Testing and Quality Assurance

◇ Chatbots and Virtual Assistants for Customer Support

◇ Voice Recognition and Speech-to-Text Conversion for Communication App

◇ AI-driven Performance Optimization for Backend Systems

◇ AI-powered DevOps Practices for Continuous Improvement and Deployment
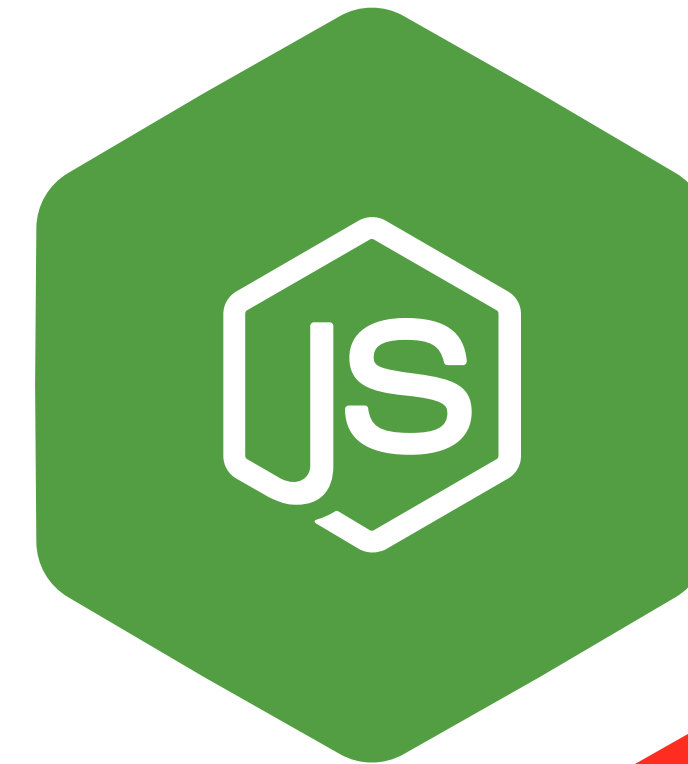

Mobile App Development

◇ Flutter Cross-platform App Development

◇ Native Android Mobile App & iOS Mobile App Development

◇ UI/UX Design for Mobile Applications

◇ Responsive Design for Various Devices

◇ Integration with Backend Services and APIs

◇ Testing and Q/A for Mobile Apps

◇ Deployment to App Stores

◇ Maintenance and Support for Mobile Apps

Mobile App Development Expertise with AI Integration

◇ AI-powered Personalization for Enhanced User Experiences

◇ Natural Language Processing (NLP) for Chatbots and Voice Assistants

◇ Image Recognition and Processing for Visual Content

◇ Predictive Analytics for User Behavior Analysis

◇ AI-driven Recommendations and Content Suggestions

◇ Voice User Interfaces (VUI) for Speech Recognition

◇ Machine Learning Models for Dynamic App Adaptation

◇ AI-driven Security Solutions for Threat Detection and Prevention

◇ Automated Testing and Quality Assurance with AI-driven Tools

◇ AI-powered Performance Optimization for Mobile Apps
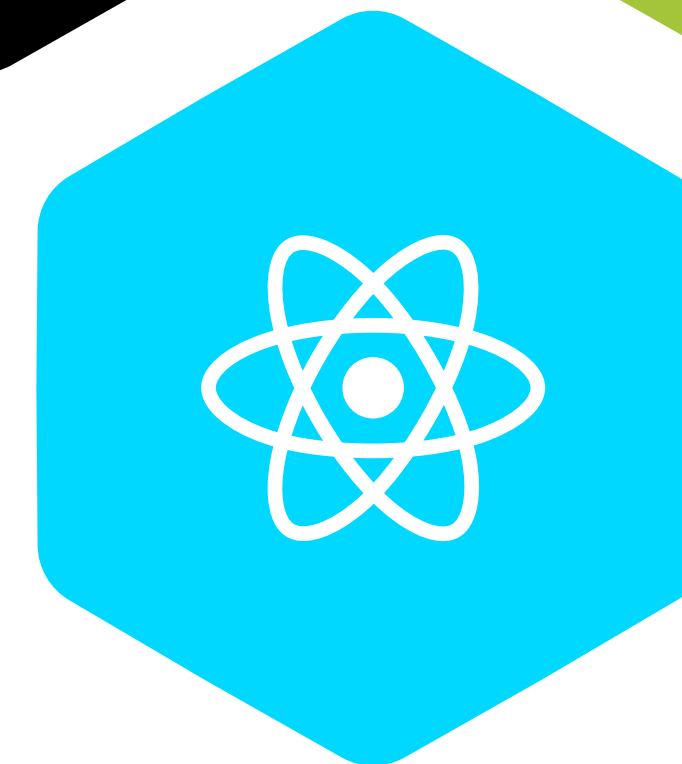

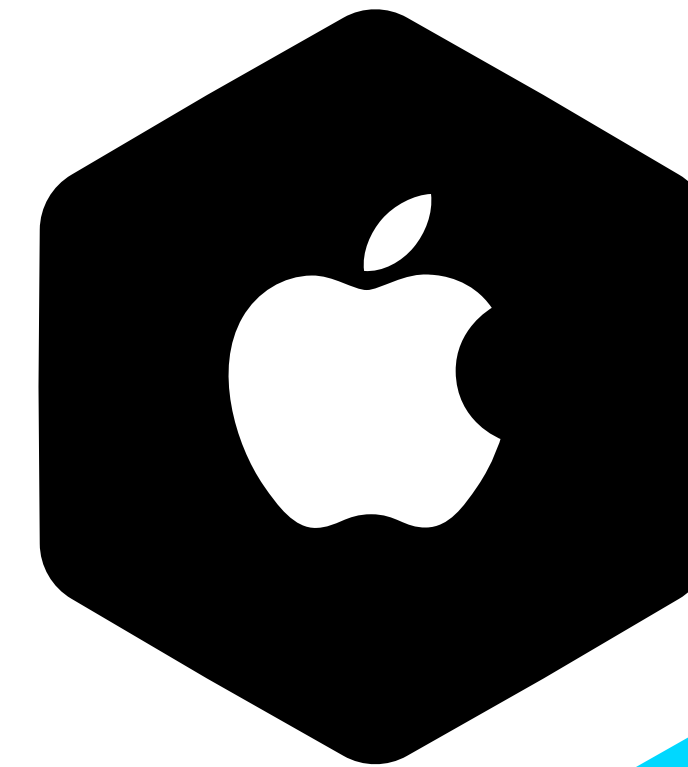

eCommerce and CMS Development

Our Ecommerce and CMS Development Expertise

◇ Custom Ecommerce Web Development
◇ CMS Development
◇ Integration with Payment Gateways and Shipping Providers
◇ Responsive for Ecommerce Platforms
◇ SEO for Online Stores
◇ User-friendly Admin Panel
◇ Customization and Extension Development
◇ Testing and QA
◇ Deployment and Maintenance Support

Ecommerce and CMS Development Expertise with AI Integration

◇ AI-driven Product Recommendations and Personalization
◇ Natural Language Processing (NLP) for Enhanced Search and Navigation
◇ Image Recognition and Processing for Visual Search and Recommendations
◇ Predictive Analytics for Customer Behavior Analysis
◇ AI-powered Chatbots for Customer Support and Assistance
◇ Voice Commerce Integration for Voice-enabled Shopping Experiences
◇ AI-driven Content Creation and Personalized Marketing Campaigns
◇ Automated Testing and Quality Assurance with AI-driven Tools
◇ AI-powered Performance Optimization for Ecommerce and CMS Platforms

Success Stories

Clothing web app

Ecommerce

Elevate textile manufacturing operations with a Clothing Web App. Overcoming challenges in admin panel functionality, accessibility, and reporting, the solution now boasts an improved codebase, responsive design, and comprehensive features for efficient inventory management and sales operations.

Our Development Process With AI Integration

We tailor our process to create robust websites and apps for all sizes. Our proficient no-code experts efficiently scope, design, and build projects, reducing time and cost compared to traditional development methods. AI integration enhances our process, blending human creativity with speed and efficiency.
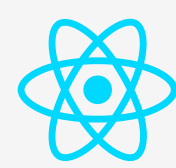

Step 1
Exploration

Duration: 1 Week

Team: Account Executive

Deliverables
- Confirmation of technical and budget fit
- High-level written proposal
- Identification of suitable project management resources

Step 2
Scoping

Duration: 2 - 3 Weeks

Team: Project Manager, Senior Project Manager

Deliverables
- Detailed requirements outlining users, pages, and features
- Refined budget, timeline, and milestones

Step 3
Design

Duration: 1 - 2 Weeks

Team: UI/UX Designer, Project Manager, Senior Project Manager

Deliverables
- High-fidelity Figma mockups
- Completed scope document
- Formation of the build team and determination of start date

Step 4
Development

Duration: week to several months(depending on complexity)

Team: Developer, UI/UX Designer, QA Tester, Project Manager, AI Specialist

Deliverables
- Automates tasks and boosts code efficiency with AI
- Fully functional website or application

Step 5
Evaluation

Duration: 30 days

Team: Developer, QA Tester, Project Manager, AI Specialist

Deliverables
- Live website or application on client's domain
- Complete transfer of intellectual property to the client

Step 5
Launches

Duration: As needed or on a monthly cadence

Team: Varied based on requirements

Deliverables
- Incremental launches based on feedback and further iterations.

Our Flexible Engagement Model to Hire Experts

At Syndell, we provide a diverse range of hiring models, allowing you to onboard dedicated software developers from a leading software development company.

Fixed Price Model

Ideal for projects with clear requirements and timelines.

Best for:

- Small Projects
- Medium-sized projects
- Projects with strict budget

Time and Material Model

Offers flexibility to adjust requirements and scope during the project.

Best for:

- Projects with evolving requirements
- Long-term projects
- Projects with difficulty in estimating scope at the outset

Dedicated Team Model

Provides high collaboration and control with exclusive developer hiring.

Best for:

- Long-term projects with variable workload
- Companies looking to extend their in-house team
- Projects requiring deep understanding and collaboration

Retainer Model

Monthly fee for reserved hours, suitable for maintenance, updates, and smaller projects.

Best for:

- Long-term partnership
- Ongoing maintenance and support
- Regular updates and enhancements needed

Hybrid Model

Maximizes flexibility by combining different models to meet specific project needs.

Best for:

- Complex projects with varying phases
- Clients seeking flexibility
- Parts of the project with clear requirements while others are more fluid

Words from Our Clients

Sarah P

The team delivered good work on our Node JS project and I enjoyed working with them. Their communication was top-notch, they met all deadlines, and their skills were reasonably strong. I enjoyed working with the Syndell team and will likely have additional jobs for them in the future.

Ted L

Fantastic team! They built my website from scratch and are consistently on hand to help with any updates or additions. Communication is quick and easy and they are highly skilled. I look forward to working with Syndell again.

David P

I hired the Syndell Team to write a Node.js server for our enterprise dashboard. They quickly showed their capabilities and finished our frontend while writing the backend of the application. We will hire this team again in the future if we are in need of NodeJS or ReactJS or any Web App Development project.

Sasha P

These guys did an exceptional job. Leveraging is unique Shopify development skills, he was able to raise the company's conversion rates. More importantly, the site now looks better than ever. A great experience with Syndell Technologies!

Brandon C

Great quality output, constructed a React Native application for us that ran well on both iOs and Android Devices. UI matched designs. Would recommend Syndell to others looking for a reliable resource.
